Import jobs and orders automatically

Bring your stops in from anywhere — no more manual data entry to start the day.

- ✓ Upload via CSV or Excel spreadsheet
- ✓ Integrate directly with your ERP or CRM
- ✓ Import from your online store like Shopify or WooCommerce
- ✓ Automatic geocoding and address validation
- ✓ Manual stop entry for unmapped addresses
- ✓ Capture arbitrary references from internal systems

PLAN

Plan your routes in seconds

Turn a list of stops into optimised,
driver-ready routes in a single click.

- ✓ Automatically assign and plan routes based on constraints
- ✓ Optimise routes for fastest completion and least fuel consumption
- ✓ Easy drag-and-drop editing interface for manual adjustments
- ✓ Organise stops by configurable zone geofences
- ✓ Create custom route templates for recurring deliveries
- ✓ View route progress in real-time with live updates and tracking

Send routes directly to your drivers' devices

Get routes onto every driver's phone instantly — no apps necessary. No setup, no friction.

- ✓ Each device has a unique link
- ✓ Assign devices to drivers, vehicles, as you see fit
- ✓ Links are PIN code-protected for security and privacy
- ✓ Browser-based, no app download required
- ✓ Easily onboard subcontractors during peak seasons
- ✓ Devices support multiple routes per day
- ✓ Export printable PDF route trip sheets for backup
